Experiment 1: Basic Cellular System Using Figma

Aim: -To create an interactive diagram illustrating the components of a basic cellular system using Figma.

Procedure

1. Open Figma and create a new design file.
2. Create rectangular boxes to represent the major components of a cellular system.
3. Add text labels for Mobile Station, BTS (Base Transceiver Station), BSC (Base Station Controller), MTSO (Mobile Telephone Switching Office), PSTN (Public Switched Telephone Network), and Databases.
4. Arrange the components in a horizontal sequence to represent the cellular communication system.
5. Use arrows between the components to indicate the direction of communication and their connections.
6. Connect the Databases component to the MTSO to show its association with network information and management.
7. Adjust the alignment, spacing, colors, and text formatting to make the diagram clear and readable.
8. Preview the design and verify that all components and connections are displayed correctly.

Output:

https://www.figma.com/proto/o6o2IzTEIzhvC98FZXUusK/Basic-Cellular-System.?node-id=5-5&p=f&t=7L2MxU9U9a12nK0U-0&scaling=min-zoom&content-scaling=fixed&page-id=5%3A4&starting-point-node-id=5%3A5

Result: -Thus, an interactive diagram illustrating the components of a basic cellular system was created successfully using Figma. The diagram represents the connections between the Mobile Station, BTS, BSC, MTSO, PSTN, and Databases.
